PRODUCTION DESIGNER
RENAUD DESCHAMPS
BIO

(**Based in Paris | Available Worldwide)** With a background in architecture and set design from Paris, I bring over three decades of visual storytelling to feature films, commercial campaigns, and fashion productions. I began my career in feature film art departments in the early 1990s before expanding into production design for global fashion and commercial projects. Beyond the set, my practice is driven by a obsession with physical media, design, and pop culture. A lifelong analogue photographer and Polaroid enthusiast, I am an avid collector of art, designer toys, and unique props. In 2002, I co-founded and served as Art Director for **BonustoyZ**, a pioneering designer toy label created alongside graffiti artist Mist to celebrate street art culture. Driven by relentless curiosity, I am always on the move—chasing time, visual texture, and compelling environments across the globe.

Renaud is representated by Lux Artists, UK and Paris. More information about his work may be found on his website:
